CAREER SUMMARY

I'm a Flutter Mobile Developer with 2 years of experience with building high-performance Android and iOS applications using Flutter and Dart. I take full ownership of features, from requirement analysis and architecture design to implementation, optimization, and deployment. I specialize in Clean architecture, state management, real-time systems with Websockets, REST API integration, Firebase services and building clean UI ensuring performance. Beyond writing code, I focus on product thinking, translating business needs into technical solutions, optimizing performance, and ensuring maintainable codebases. My goal is not just to build apps, but to deliver stable, scalable mobile products that solve real problems.

WORK EXPERIENCE

Mobile Developer, Deepminds Ventures | UAE, Remote 08/2025 - Present

- Develop cross-platform 4 mobile applications using Flutter for Android and iOS.
- Apply Clean Architecture principles with a feature-based folder structure and dependency injection using GetIt.
- Implement BLoC/Cubit for scalable state management and clear separation between UI and business logic.
- Integrate RESTful APIs, WebSockets, and Push Notifications using FCM.
- Implement secure authentication flows, secure storage, and biometric authentication.
- Translate Figma designs into pixel-perfect Flutter UI.
- Build reusable UI components and centralized theming to ensure design consistency across the app.
- Implement declarative navigation using GoRouter.
- Optimize application performance, responsiveness, and scalability.
- Manage deployment processes for both Android (Google Play) and iOS (App store).
- Configure CI/CD pipelines using Codemagic for automated builds and releases.
- Implement multi-language localization support.
- Collaborate with founders and technical teams to define product vision and technical roadmaps.
- Collaborate with cross-functional teams (mobile, web, backend, design, business).

UX/UI Designer, SilkRoad Business Management | United Kingdom, Remote 06/2025 - 08/2025

- Designed modern, user-centered website interfaces and responsive layouts using Figma.
- Collaborated with SEO specialists and business teams to redesign high-traffic websites while preserving SEO performance.
- Created wireframes, prototypes, design systems, and reusable UI components.
- Participated in planning and prioritization of redesign tasks across multiple company platforms.

Mobile Developer | Freelance 03/2023 - 08/2025

- Built and delivered mobile applications using Flutter and Java.
- Integrate RESTful APIs, and Firebase services (Authentication, Firestore, FCM, Storage).

- Implemented authentication flows, API integration and caching.
- Used BloC, and GetX for efficient state management.
- Worked directly with clients to gather requirements and deliver production-ready apps.

External Relations Coordinator | GDG Algiers (Volunteering)

12/2023 - 07/2025

- Coordinated partnerships and sponsorships for developer-focused events, workshops, and hackathons.
- Contributed to community growth and knowledge sharing within the local tech ecosystem

PROJECTS

Intelligent Water Management App

- Developed a Flutter mobile application as part of a smart water management ecosystem integrating IoT devices.
- Implemented real-time data streaming using WebSockets to track data instantly.
- Integrated Bluetooth communication to securely pair the mobile app with the IoT devices.
- Integrated AI-based invoice scanning to extract data.
- Delivered push notifications using Firebase Cloud Messaging (FCM).
- Implemented local caching to improve performance and reduce latency.
- Applied Clean Architecture, Dependency Injection and BloC/Cubit for state management to ensure scalability, testability, and maintainable code.
- Implemented CI/CD configuration for automated builds and release management.

Maritime Management App

- Contributed to the development of a comprehensive maritime management app for ship operators to monitor and manage vessel operations.
- Implemented scalable architecture using Clean Architecture, feature-based modular structure, and Dependency Injection.
- Applied BLoC/Cubit pattern to manage complex state and ensure separation between presentation and business logic.
- Implemented Dark/Light theming with a centralized design system.
- Integrated RESTful APIs with proper error handling, pagination, caching, and retry mechanisms.
- Implemented push notifications using Firebase Cloud Messaging (FCM).
- Implemented secure local storage and token lifecycle management.
- Built reusable widgets and shared components to ensure scalability across modules.
- Integrated AI-powered features for automated document data extraction.
- Implemented CI/CD configuration for automated builds and release management.
- Ensured performance optimization, modularity, and maintainability across the codebase.

Startup Readiness App

- Contributed to the development of a Flutter mobile application designed to assess startups' readiness for adopting AI solutions.
- Designed and implemented a modular architecture using Clean Architecture and feature-based structure.
- Built authentication and secure user flows to ensure personalized assessment results.
- Managed complex multi-step workflows (dynamic stepper forms) with advanced state management using BLoC/Cubit.
- Integrated RESTful APIs with structured error handling, loading states, and response mapping.

MarhbaBik - All-in-One Algerian Tourism App

- Built an all-in-one tourism mobile app for discovering destinations, hotels, and tours.

- The app supports both multiple user types such as tourists and services' providers.
- Built multi-role authentication and dynamic UI rendering.
- Integrated third-party payment gateway with secure transaction handling.
- Implemented Firebase services (Authentication, Firestore, Storage, FCM).
- Designed smooth booking flows and clean UI.

TECHNICAL SKILLS

- **Mobile Development:** Android, iOS, Flutter, Dart, Java, Firebase, XML, Clean Architecture, BloC, GetX, Rest API integration, Websocket Integration, Push notifications, XCode, Android Studio, Deployment(Google Play, App Store) , CI/CD (Code magic).
- **Backend Development:** Python, Flask, Rest Api, Firebase, Kafka, Node JS.
- **Databases:** Oracle (SQL, PL/SQL), MySQL, MongoDB, SQL Server, Cassandra.
- **UI/UX Design:** Figma, Wireframing, Prototyping, User Flow, UI design
- **Collaboration Tools:** Git/GitHub/Gitlab, Agile/Scrum, Cross-functional teamwork, Clickup, Notion, Airtable, Project Management, Team work.

CERTIFICATIONS

- Certification Flutter & Dart - The Complete Guide, Udemy 05.2024
<https://udemy-certificate.s3.amazonaws.com/image/UC-412849e4-c4e4-4e23-bbd2-9297ec5dfedc.jpg>
- Certification Python and Flask Framework, Udemy 10.2024
https://udemy-certificate.s3.amazonaws.com/image/UC-165f7e7c-0922-4054_9193-8661b85548c2.jpg

EDUCATION

- Master's degree in Computer Science | University of Science and Technology Houari Boumedienne USTHB
- Bachelor's degree in Computer Science| University of Boumerdes

LANGUAGES

- Arabic (Native)
- English (C1)
- French (B2)
